

Bowen und Diabetes

Robyn Wood

1-Tagesseminar
Voraussetzung: Modul 8

Diabetes is recognised as an ever increasing world wide health crisis.

Choosing appropriate Bowen procedures for Diabetics is often challenging for Practitioners. This workshop will add confidence and competence to your skills. We explore the different types of Diabetes, to gain a deeper understanding of the disease and its associated problems.

- The Role of the Pancreas
- Understanding the various types of Diabetes.
- Clinical tests and treatments
- Specific problems associated with Diabetes
- Symptoms which should activate Medical Referral
- Bowen moves to support the Diabetic
- Bring your First Aid Book to Class
